# Bostik's Green Commitment

## **INNOVATIVE NEW PRODUCTS TO PRESERVE THE ENVIRONMENT**

Bostik is committed to offering innovative product solutions which contribute to sustainable development in construction. This is achieved through continuously developing greener products and packaging. Bostik anticipates and exceeds the needs of its customers while minimising environmental impacts.

## **PROMOTING PRODUCT STEWARDSHIP**

Right from the research stage, Bostik integrates health, safety and environmental criteria into each new product development. As a signatory to the National Packaging Covenant, Bostik is firmly committed to reducing the environmental impact of packaging. Further down the line, Bostik applies the same degree of rigour to labeling, preparation of safety documents (safety data sheets). This ensures optimum conditions for the storage, shipment and use of its products. Our relationship with our customers includes technical assistance aimed at optimising the use of our products for the greater protection of people and the environment.

## **REDUCED IMPACT OF COMPANY ACTIVITIES ON THE ENVIRONMENT**

All Bostik production sites monitor the characteristics of emissions and waste rigorously and systematically. Performance indicators provide a regular assessment of the environmental performance. Action plans are continuously updated and implemented to reduce the impact on the environment.

## **PROMOTING ENVIRONMENTAL MANAGEMENT**

Systems are in place to manage Bostik's ISO 9001 safety and quality performance systems are based on a continuous improvement process.

## **LOCAL AUTHORITY**

The Green Building Council of Australia developed the Green Star environmental rating system for building and construction. A growing number of projects are adopting these green building processes to promote a healthier environment, minimise global impacts and improve the satisfaction and living environments of the population. Builders, re-modelers, engineers, product manufacturers, architects and consumers alike are using these guidelines to create new approaches to construction and remodeling projects that will benefit today and the world tomorrow.

## Titan Bond Plus

Bostik Titan Bond Plus is a two component high performance, solvent free epoxy adhesive that dries to an off-white colour. It has an unique properties that displaces water then bonds to material.

### FEATURES

- Can be applied in fresh, chlorinated or salt water as well as in dry surfaces.
- Cures underwater (fresh, salt or chlorinated)
- High bond strength exceeds PVC wall strength
- Versatile adhesive that remains flexible when dry.
- Ideal for shrinking and expanding joints
- Stretches 30% without separating
- Suitable as an adhesive or for gap filling applications
- Withstands mechanical shocks
- Resists bending, shock and vibration failures
- Has thermal operating range of 20°C to 80°C
- High chemical stability in acids and caustics
- Brittle free
- Solvent free - safe even in enclosed area

# DIY Adhesives

## Epoxy Bond

Bostik Epoxy Bond is a special two part adhesive which, when mixed and allowed to set, produces bonds of immense strength. This resin based epoxy sets in approximately 5 minutes to give a permanent and colourless bond. It will adhere pottery, china, metals, glass, wood, rigid and semi rigid plastics and cardboard, etc. where an industrial strength bond is required by handymen, hobbyists and tradesmen.

### FEATURES

- Quick setting - will bond in 5 minutes
- When fully cured, the adhesive can withstand boiling water for short periods of time
- Heat resistance rating of 60°C temperature continuously
- Adhesive strength of 800 psi for metal/metal bonds

Product Name	Item No.	SAP No.	Colour	Unit Size	Pack Size	APN
